WALLTECH NEUTRALISER

Neutraliser / Stabiliser

Walltech Neutraliser is an alkali solution that protects against the long term effects of acid cleaning products on brick, concrete and masonry surfaces. Fast and effective neutralising that will leave newly cleaned surfaces looking great. Added stabilisers reduce possibility of chemical reaction caused by chemical treatment.

Directions Apply directly to the surface being treated approximately 5:1 with water. Walls and surfaces should be treated as soon as possible after acid cleaning or removal of stains caused by acid burn or efflorescence.

Advantages Walltech Neutraliser is a mixture of alkali salts and corrosion inhibitors that neutralise and protect against the effects of strong acid based cleaners.

Description clear colourless solution
Packaging 20 Litre, 200 Litre, 1,000 Litre IBC
